**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 August 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 11 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kroll et al (4,763,660). Applicant's attention is directed Figure 4 and column 4, line 48 – column 5, line 21. Perforations are detailed at column 4, line 65. Details of the various layers of the wiring are disclosed at column 5, line 22 – column 6, line 58. The layers include soft members 40 and 47.

Claim 11 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kornrumpf et al (6,415,169). Applicant's attention is directed Figures 1-9 and the detailed description thereof. Figures 7-9 clearly show the details of the split induction part. Details of the various layers of the wiring are disclosed at column 2, line 44 – column 3, line 35. The layers include soft members 24 and 30.

Claim 11 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Istvan et al (7,197,357). Applicant's attention is directed Figures 2 and 3 and column 4, lines 9 -56. Perforations are detailed at column 4, line 55. Details of the various layers of the wiring are disclosed at column 3, lines 30-53. The layers include soft members 22 and 24.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6, 7, 9, and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kornrumpf et al (6,415,169) in view of Kroll et al (4,763,660). The circuit of Kornrumpf et al includes first and second substantially parallel segments having substantially the same shape and length. The segments have a temporary connection 37. Kornrumpf et al fail to clearly disclose the use of perforations connecting the segments. Such a feature (i.e., parallel segments fully connected by perforations) is specifically taught by Kroll et al as detailed supra. Given this teaching, it would have been obvious to use perforations to connect the split induction parts in Kornrumpf et al to effect a more compact design feature since a predictable result would ensue. The particular dimensions and breaking strength is within the level of skill of the artisan to select to optimize performance of the apparatus.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
